Introduction

PPC-L61T is a 6.5" industrial-grade Panel PC (PPC) for small interface requirements such as Human Machine Interfaces (HMI) or Multifunctional Products (MFP). PPC-L61T is highly reliable because it incorporates a low power CPU that does not need a cooling fan. The robust aluminum makes this interface suitable for long-term solutions, and especially suitable for environments such as chemical and food processing plants. PPC-L61T comes with an embedded OS for faster application development, so driver development and customization of images do not slow down project implementation.
